DETAILED ACTION

This office action is in response to the election filed June 17, 2005.

Election/Restrictions

1. Claims 21-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group(s), there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 17, 2005.
2. This application is in condition for allowance except for the presence of claims 21 to 26 non-elected without traverse. Accordingly, claims 21-26 have been cancelled.

Information Disclosure Statement

3. The prior art documents submitted by Applicant in the Information Disclosure Statements filed on July 23, 2003, have been considered and made of record (note attached copy of forms PTO-1449).

Drawings

4. The drawings filed July 23, 2003 have been acknowledged.

Allowable Subject Matter

5. Claims 1-20 are allowed. The following is an examiner's statement of reasons for allowance: the relevant prior art of record does not teach or reasonably suggest a detector for detecting a ligand in a fluid that has a *gapped waveguide* section that extends across a cantilever, and when the *ligand binds* to the cantilever, the induced bending of the cantilever (due to the ligand) causes movement in the waveguide, causing a decrease in coupling light *across the gapped waveguide*. The closest prior art of record (Lee et al. U.S.P. No. 5,807,758; Oden U.S.P. No. 6,269,685) teach cantilevered detectors that sense parameters in fluids/liquids, but the prior

art does not teach or reasonably suggest the specific optical function in which the ligand is detected. Blanket statements in Lee et al. '758 (see column 8, lines 31-36) and Oden '685 (claim 4 "optic means") do not reasonable suggest the specific gapping optical waveguide structure with movement due to bending, as claimed by Applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Inventorship

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Conclusion

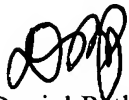

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure, PTO-892 form reference A to de Charmoy Grey et al.
